Yukon & Yukon II Transmission Gear Upgrade

Yukon & Yukon II Upgrade

ETON America has improved the Yukon & Yukon II Shift shaft , drive shaft and counter shaft assemblies

The new Shift Shaft assembly primary drive gear has been increased in size and tooth count.

We have also added a retainer clip to the shaft along with the pressed collar to insure proper alignment. The drive shaft and counter shaft have been geared to match the new shift shaft assembly.

When replacing any of these parts on CXL-150 with a VIN number less than RFZFJB...3A**010360** or any YXL-150, all three parts **MUST** be replaced.

Part Numbers are:	
Shift Shaft Assembly	800290
Drive Shaft	800103
Counter Shaft	800286
