Do NOT send to ETON

As members of the Motor Vehicle industry, our staff and management would like to thank you for your purchase of an E-TON Scooter. We sincerely believe you will receive years of enjoyment from this purchase.

As with any motorized vehicle, accidents can and do occasionally occur. It is for this reason and your understanding of your Scooters safety, that we specifically bring the following points to your attention. We ask that you read each point carefully and ask your sales rep if you do not clearly understand any particular points.

Initials

- _____ 1. I have received the owner's manual and agree to read it, especially the safety warnings, before using the Scooter. I understand that all riders should wear an approved helmet and all appropriate safety gear whenever riding the Scooter.
- _____ 2. I understand that this Scooter is subject to all laws of the road, and that many states and localities have additional laws which specifically apply to Scooters. Some states require registration and licensing of Scooters, along with driver licensing requirements.
- _____ 3. I have been instructed in the proper use of the braking and speed managing mechanisms of this Scooter, and the recommended pre-ride safety inspection.
- _____ 4. I have been advised on the proper sized scooter unit for my needs, but final selection of this Scooter has been my own decision.
- _____ 5. I understand that regular maintenance is required to keep this Scooter operating properly and that failure to maintain this Scooter may void the manufacturer's warranty and may result in the Scooter becoming unsafe to operate. Regular maintenance includes frequent inspection of all periodical check mechanisms and wheel retention devices. I also understand that maintaining appropriate tire pressure at all times is essential for the safe use of this Scooter. The recommended tire pressure is marked on the tire and is also found in the owner's manual.

By initialing each item on the above checklist, I have indicated my complete understanding of these points, and I acknowledge my responsibilities regarding the contents. I also agree to explain the points on this checklist to anyone besides myself who will be using the Scooter now and in the future.

E-TON SPORT 50 SETUP INSTRUCTIONS

1) Uncrate scooter.

2) Ensure inventory parts package is complete. (See checklist on other side).

3) Prepare battery by adding the electrolyte. Allow about 1 hour for the battery to come to a full charge. **DO NOT put on charger.**

4) Install the rear wheel guard by installing the three Phillips head screws as shown.

5) Check the tire pressure.

Front tire: 18 psi

Rear tire: 25 psi

6) Install the handlebar mirrors using a 14mm wrench. (NOTE: Right-hand mirror is left-hand threaded).

7) Install the battery in the battery compartment in the floor board. Attach the leads:

Red to **positive** terminal

Black to **negative** terminal

8) Install the battery compartment cover with the four screws provided.

9) Fill the oil reservoir with high grade 10w30 SAE oil if necessary. To check the oil level, use the crankcase oil dipstick located on the right side of the engine just under the fan cover. If the oil level is low, fill to the required level.

E-TON SPORT 50 SETUP INSTRUCTIONS

10) Check all fuel lines for leaks and loosen the carburetor bowl drain screw. Allow fuel to drain from the carburetor until it runs clear.

11) Tighten the carburetor bowl drain bolt.

12) Check the rear brake adjustment. Adjust the rear brake cable to remove all slack so that the brake arm starts to engage when the brake lever is squeezed. (No more than 1/4" of free travel at the lever tip.)

13) Check front and rear wheel axle nut torque.

Front: 44 lbf-ft / 6.0 kgf-m

Rear: 86 lbf-ft / 12.0 kgf-m

14) Check the speedometer cable connection at the front wheel.

15) Check for proper operation of all lamps, turn signals, head lights, and tail lights.

16) Start the engine by setting the engine stop switch to the ON "O" position and squeezing the right-hand brake lever to engage the safety brake switch. Press the starter button while gently engaging the throttle. **If the engine does not start, ensure the anti-theft switch under the seat is set to the OFF (unlocked) position.**

17) Check the engine idle by allowing the engine to warm for 5-10 minutes. Ensure the idle speed is 1600RPM. Adjust if needed.

18) Test ride the scooter and check all nuts and fasteners for proper tightness.

19) Complete the setup form checklist.
