Dealer's File
Do NOT send to ETON

As members of the Motor Vehicle industry, our staff and management would like to thank you for your purchase of an E-TON ATV. We sincerely believe you will receive years of enjoyment from this purchase.

As in many recreational activities, accidents can and do occasionally occur. It is for this reason and your understanding of your ATV safety, that we specifically bring the following points to your attention. We ask that you read each point carefully and ask your sales rep if you do not clearly understand any particular points.

Initials

1. I have received the owner's manual and agree to read it, especially the safety warnings, before using the ATV. I understand that all riders (adult and children) should wear an approved helmet and all appropriate safety gear whenever riding the ATV.
2. I understand that this ATV is subject to all laws of the road, and that many states and localities have additional laws which specifically apply to ATV's.
3. I have been instructed in the proper use of the braking and speed managing mechanisms of this ATV unit, and in the use of all quick release mechanisms (wheels, seat post and brakes) as well as any wheel retention devices on this ATV.
4. I have been advised on the proper sized ATV unit for my needs, but final selection of this ATV has been my own decision.
5. I understand that regular maintenance is required to keep this ATV unit operating properly and that failure to maintain this unit may void the manufacturer's warranty and may result in the ATV becoming unsafe to operate. Regular maintenance includes frequent inspection of all periodical check mechanisms and wheel retention devices. I also understand that maintaining appropriate tire pressure at all times is essential for the safe use of this ATV. The recommended tire pressure is marked on the tire and is also found in the owner's manual.

By initialing each item on the above checklist, I have indicated my complete understanding of these points, and I acknowledge my responsibilities regarding the contents. I also agree to explain the points on this checklist to anyone besides myself who will be using the ATV now and in the future.

ETON Viper 150 (RXL-150) Setup Instructions

1. Uncrate ATV

2. Inventory Parts Package (see Check List)

3. Prep battery by adding electrolyte. (About 1 hour for battery to come to full charge. **DO NOT** Put on charger.)

4. Attach tie rod ends using 10mm Lock nut (2). Torque to 25ftlb and install $\frac{3}{4}$ cotter keys (2).

5. Align brake backing plate by placing alignment hole over locator pin on the spindle assembly.

6. Install front bumper using 8x16mm bolts (2), 8x35mm bolts (2) and Front Bumper Collar (2). Torque to 16ftlb

7. Install rear bar assembly using 8x16mm bolts and lock washers (4). Torque to 16ftlb.

8. Connect rear tail / brake light wire to harness.

9. Inflate front and rear tires to 4psi

10. Check torque of rear axle nuts. Torque to 45ftlb.

11. Install front and rear wheels. Note rotation arrows on tires when installing.

12 Attach front wheels:

- a. Front wheel Assembly
- b. 15x24x5t front wheel washer (2),
- c. 14mm castle nut (2). Torque to 44flb.
- d. Insert 1 ¼ cotter key (2)

13. Attach rear wheels:

- a. wheel assembly
- b. 40x14x4.5t washer (2),
- c. 14mm flange castle nut (2). Torque to 44flb.
- d. Insert 1 ¼ cotter key (2)

14. Install wheel hub caps over wheel nuts. (4).

15. Position handlebar assembly and tighten the 5mm hex head socket bolt to secure. (Caution: Do not over tighten.)

16. Install left footrest & right footrest using 6x18mm button head screw(7) , 6x16mm hexagon head bolt (1) and flange Nut (3).

17. Install left footrest & right footrest using 6x23mm button head screw (2) and Flange Nut (2).

18. Check engine oil level. Fill to full line using SAE 30w engine oil.

19. Remove seat by pulling seat latch under rear fender.

20. Install battery. Attach red lead to positive terminal and black lead to negative terminal.

21. Secure battery with rubber battery strap.
22. Check under seat storage compartment for tool kit and place owner's manual in compartment.
23. Replace seat.

24. Turn on ignition key, check gear shift shaft position indicator lights by moving shaft from reverse to forward position. (Reverse position red light, neutral green light, and forward blue light.)
25. Remove fuel cap and fill tank with gasoline. (At least 89 octane)
26. Replace fuel cap and install breather tube through hole in instrument panel below indicator lights.

27. Check fuel system for leaks.
28. Lock parking brake using right hand lever and lock button.

29. Move gear shift shaft into neutral position.

30. Move engine stop switch to on , "⏻", position.
31. Turn ignition key to on position.
33. While holding the left hand brake lever in, start unit by pressing yellow starter button. (DO NOT crank starter motor more than 15 seconds)
34. Allow unit to warm up for 4-5 minutes.
35. Check idle speed. Adjust to run at 1500-1800rpm.
37. Check for any loose bolts and fasteners.
38. Complete set-up form check list.
